重庆大学 2014 届新生英语分级考试模拟一

A卷 ○ B卷

2014—2015 学年第一学期

开课学院：课程号：04033530 考试日期：2014 年 9 月

考试方式： ○ 开卷 ● 闭卷 ○ 其他 考试时间：120 分钟

题号	一	二	三	四	五	六	七	八	九	十	总分
得分											

考试提示

1.严禁随身携带通讯工具等电子设备参加考试；

2.考试作弊，留校察看，毕业当年不授学位；请人代考、替他人考试、两次及以上作弊等，属严重作弊，开除学籍。

****

注意事项

一、 本试题册由听力、阅读、词汇和完形四部分组成。专供重庆大学 2014 级新生开学英语分级考试使用。

二、 准考证号由 000+学号组成，共 11 位数。如：000+ xxxxxxxx（学号）。请将自己的姓名、准考证号写在答题卡和试卷二上。考试结束后，交回试题册、答题卡 1 和 答题卡 2。

多项选择题的答案一定要划在答题卡 1 上。主观题的答案写在答题卡 2 上。凡是写在试题册上的答案一律无效。

Part I Skimming and Scanning（15 minutes）

（请于正式开考后15分钟内完成该部分，之后将进行听力考试）

Directions: *In this part, you will have 15 minutes to go over the passage quickly and answer the questions on Answer Sheet 1. For questions 1-7, choose the best answer from the four choices marked [A], [B], [C] and [D]. For questions 8-10, complete the sentences with the information given in the passage.*

Getting Thin - for Good

Just about everyone has been on a diet at one time or another, and millions of us have learned that the weight we lose is all too easily regained. Still few people question the wisdom of dieting. After all, we reason, the worst that can happen is that we'll regain the weight we've lost - then we can simply go on a diet again.

But some new research suggests there is a risk: yo-yo dieting may seriously distort the body's weight-control system. The more diets you go on, the harder it may become to lose weight. Even worse, new evidence indicates that repeated cycles of losing and gaining weight may raise the risk of heart problems.

This last possibility is especially disturbing. As part of a 25-year study that monitored 1 959 men, researchers at the University of Texas School of Public Health in Houston reported in March 1987 that the men showing large up-and-down weight changes had twice the risk of heart disease as those with only small changes in weight. One paper from the Framingham (Mass.) Heart Study, which has monitored more than 5 000 people for 40 years, also provides troubling information: people who lost ten percent of their body weight had about 20 percent reduction in risk of heart disease - but people who gained 10 percent raised the risk by 30 percent. These numbers further suggest that going from 150 to 135 pounds, and back to 150 again, could leave you with a higher heart-disease risk than you started with.

When you cut calories and lose weight, your body will protect itself by reducing your basal metabolic rate (BMR). This is the measure of the energy used for routine functions such as breathing and cell repair - roughly 60 to 75 percent of the energy consumed by the body. During severe dieting, your BMR drops within 24 hours and can decline a full 20 percent within two weeks. This metabolic decline is one reason dieters often reach a steady unchanging period, and find that the same caloric intake which melted pounds earlier now produces no weight loss.

The body adapts to dieting in other ways. The enzyme lipoprotein lipase(脂肪酶), a chemical in the body, which controls how much fat is stored in fat cell, may become more active in some overweight people after they have lost weight. That would make the body more efficient at fat storage - exactly what the dieter doesn't want. And this change, like the

命题时间：2014.9.1

drop in BMR, may be part of the reason dieters frequently regain their lost weight.

My interest in the yo-yo problem began in 1982, when my colleagues Thomas Wadden and Albert Stunkard and I were experimenting with very-low-calorie diets - 800 calories or fewer per day. We hoped that patients in our clinic could lose large amounts of weight rapidly, then keep the weight loss with a behavior-modification program.

We found, however, that some people lost weight rapidly, some slowly; some lost for a while and then stopped losing. One woman, Marie, began the program at 230 pounds, reduced to 192 pounds, and then "hit a wall", even though she stayed on her diet and walked two miles a day. Marie, like many others in our program, had been a yo-yo dieter, and they tended to have the most difficulty in losing weight.

To see if such dieting could really change the body this way, other researchers and I began to study weight changes in animals. We fed a group of rats a high-fat diet until they became obese. Then we changed their diets repeatedly to make them lose weight, regain, lose again and regain again.

The results were surprising. The first time the rats lost weight, it took 21 days for them to go from obese to normal weight. On their second diet, it took 46 days, even though the rats consumed exactly as many calories.

With each yo-yo, it became easier for the rats to regain. After the first diet, they took 46 days to become obese again; after the second diet, they took only 14 days. In other words on the second yo-yo cycle, it took more than twice as long to lose -weight, and only one-third as long to regain it.

Surprised, our group contacted Harvard surgeon George Blackburn, a pioneer in the use of very-low-calorie diets. Blackburn and his colleagues reviewed the records of 140 dieters who had been through their weight-control clinic, had lost weight and regained it - and had returned for a second try. The records showed the dieters had lost an average of 2.3 pounds a week the first time, but only 1.3 pounds a week the second time.

Four years ago we began the Weight Cycling Project, a major study that includes some of the country's leading obesity researchers. We know that people who lose weight by dieting only and without an exercise program can lose a considerable amount of muscle. But then, if they gain weight back, they may regain less muscle and more fat. While the reason isn't clear, it may be easier for the body to put fat on than to rebuild lost muscle. We're asking if yo-yo dieters may lose fat from one part of the body and regain it elsewhere. For instance, according to our preparatory studies in animals, they could move fat to the abdomen. And research shows that abdominal fat raises the risk of heart disease and diabetes more than fat around the hips and thighs does.

None of this means that dieting is ineffective or foolish. For those who are 20 percent or more overweight, there are good reasons to reduce: successful weight loss can lower blood pressure and cholesterol, help control blood sugar in diabetics and enable people to feel better about themselves. But the new research does suggest that dieting must be taken seriously by people at any weight.

It also means that dieting alone is not the best way to weight control. When a weight-loss program includes exercise, you lose more fat and less muscle, and you're not likely to gain the weight back. That's because exercise may help resist the physiological changes that tend to come from yo-yo dieting.

Given the potential risks of yo-yo dieting, anyone who diets should be especially careful not to gain the weight back. Before you diet, ask yourself how determined you are; then set reasonable goals.

Permanent weight loss should be the main goal, so select a program that will help you change your life-style. Be careful of popular diet programs designed for rapid weight loss and filled with senseless tricks, such as going on and off a diet, eating "magic" foods and so on. A program should focus on sensible changes in nutrition and life-style. The best approach is a low-fat, high-complex-carbohydrate diet and regular physical exercise.

To avoid failing in the diet, recognize and plan for high-risk situations. If you always overeat when you visit your parents, for example, figure out how to get around that before your next visit. Understand that desires - for chocolate, say - are like waves that come up, will quickly subside. When the desire comes, get busy with a simple activity - reading or even brushing your teeth.

1. What is the risk that yo-yo dieting may bring according to the new research?

A) It may damage the body's weight-control system seriously

B) It may make the task of losing weight more difficult

C) It may make it easier for the weight we lose to be regained

D) It may cause people fear for going on a diet

2. What is the automatic reaction of your body when you are on diet?

A) It will consume more energy.

B) It will suffer from terrible heart break.

C) It will reduce your basal metabolic rate.

D) It will absorb more caloric intake automatically.

3. What is the basic function of enzyme lipoprotein lipase?
A) to become active in order to lose weight
B) to control how much fat is stored in fat cell
C) to help cell regain the weight lost after being on diet
D) to drop the BMR of the dieter

4. What does "hit a wall" mean when the author use it to refer Marie?
A) It means that people achieved his goal of losing weight.
B) It means that people stopped to stay on diet.
C) It means that people started to walk two miles a day
D) It means that people stepped into the most difficult stage of losing weight.

5. According to the author, the result of the rat research can be described as _____?
A) disappointing B) exciting C) meaningless D) surprising

6. What will happened on a dieter if he or she gain weight back without exercise?
A) They may regain the same muscle and fat.
B) They may regain more muscle and less fat.
C) They may regain less muscle and more fat.
D) They may become healthier than before

7. In order to lose weight permanently, which of the following advice that people should follow?
A) going on and off a diet
B) eating magic foods
C) avoiding being on diet
D) eating low-fat, high-complex-carbohydrate diet and doing physical exercise regularly

8. When a weight-loss program includes exercise, you lose more fat and less muscle, and you're not likely to _____

9. In order to succeed in the diet one should know beforehand and make plans for_____

10. When a dieter wants to eat chocolate, he or she should get busy with _____

Part II Listening Comprehension (30 minutes)

Section A

Directions:*In this section, you will hear 8 short conversations and 2 long conversations. At theend of each conversation, one or more questions will be asked about what was said. Both the conversation and the questions will be spoken only once. After each question there will be a pause. During the pause, you must read the four choices marked A), B), C) and D), and decide which is the best answer. Then mark the corresponding letter on* ***Answer Sheet 1*** *with a single line through the centre.*

注意：此部分试题请在**答题卡1** 上作答。

1. A) The rock band needs more hours of practice.
B) The rock band is going to play here for a month.
C) Their hard work has resulted in a big success.
D) He appreciates the woman's help with the band.

2. A) Go on a diving tour in Europe. C) Travel overseas on his own.
B) Add 300 dollars to his budget. D) Join a package tour to Mexico.

3. A) In case some problem should occur. C) To avoid more work later on.
B) Something unexpected has happened. D) To make better preparations.

4. A) The woman asked for a free pass to try out the facilities.
B) The man is going to renew his membership in a fitness center.
C) The woman can give the man a discount if he joins the club now.
D) The man can try out the facilities before he becomes a member.

5. A) He is not afraid of challenge.
B) He is not fit to study science.
C) He is worried about the test.
D) He is going to drop the physics course

6. A) Pay for part of the picnic food. C) Buy something special for Gary.
B) Invite Gary's family to dinner. D) Take some food to the picnic.

7. A) Bus drivers' working conditions. C)Public transportation.
B) A labor dispute at a bus company. D) A corporate takeover.

8. A) The bank statement. C) The payment for an order.
B) Their sales overseas. D) The check just deposited.

Questions 9 to 11 are based on the conversation you have just heard.

9. A) A hotel receptionist. C) A shop assistant.
B) A private secretary. D) A sales manager.

10. A) Voice.
    B) Intelligence.
    C) Appearance.
    D) Manners.
11. A) Arrange one more interview.
    B) Offer the job to David Wallace.
    C) Report the matter to their boss.
    D) Hire Barbara Jones on a trial basis.

Questions 12 to 15 are based on the conversation you have just heard.

12. A) He invented the refrigerator.
    B) He patented his first invention.
    C) He got a degree in Mathematics.
    D) He was admitted to university.
13. A) He distinguished himself in low temperature physics.
    B) He fell in love with Natasha Willoughby.
    C) He became a professor of Mathematics.
    D) He started to work on refrigeration.
14. A) Finding the true nature of subatomic particles.
    B) Their work on very high frequency radio waves.
    C) Laying the foundations of modem mathematics.
    D) Their discovery of the laws of cause and effect.
15. A) To teach at a university.
    B) To patent his inventions.
    C) To spend his remaining years.
    D) To have a three-week holiday.

Section B

Directions:*In this section, you will hear 3 short passages. At the end of each passage, you will hear some questions. Both the passage and the questions will he spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on* ***Answer Sheet 1*** *with a single line through the centre.*

注意：此部分试题请在**答题卡1**上作答。

Passage One

Questions 16 to 18 are based on the passage you have just heard.

16. A) They have fallen prey to wolves.
    B) They have become a tourist attraction.
    C) They have caused lots of damage to crops.
    D) They have become a headache to the community.
17. A) To celebrate their victory.
    B) To cheer up the hunters.
    C) To scare the wolves.
    D) To alert the deer.
18. A) They would help to spread a fatal disease.
    B) They would pose a threat to the children.
    C) They would endanger domestic animals.
    D) They would eventually kill off the deer.

Passage Two

Questions 19 to 22 are based on the passage you have just heard.

19. A) She is an interpreter.
    B) She is a tourist guide.
    C) She is a domestic servant.
    D) She is from the royal family.
20. A) It was used by the family to hold dinner parties.
    B) It is situated at the foot of a beautiful mountain.
    C) It was frequently visited by heads of state.
    D) It is furnished like one in a royal palace.
21. A) It is elaborately decorated.
    B) It has survived some 2,000 years.
    C) It is very big, with only six slim legs.
    D) It is shaped like an ancient Spanish boat.
22. A) They are uncomfortable to sit in for long.
    B) They do not match the oval table at all.
    C) They have lost some of their legs.
    D) They are interesting to look at.

Passage Three

Questions 23 to 25 are based on the passage you have just heard.

23. A) It in an uncommon infectious disease.
    B) It destroys the patient's ability to think.
    C) It is a disease very difficult to diagnose.
    D) It is the biggest crippler of young adults.
24. A) Search for the best cure.
    B) Hurry up and live life.
    C) Write a book about her life.
    D) Exercise more and work harder.
25. A) Aggressive.
    B) Adventurous.
    C) Sophisticated.
    D) Self-centered.

Section C

Directions:*In this section, you will hear a passage three times. When the passage is read fort the first time, you should listen carefully for its general idea. When the passage is read for the second time, you are required to fill in the blanks with the exact words youhave just*

heard. Finally, when the passage is read for the third time, you shouldcheck what you have written.

注意：此部分试题请在**答题卡1**上作答。

It's difficult to estimate the number of youngsters involved in home schooling, where childrenare not sent to school and receive their formal education from one or both parents. (26)_____ and court decisions have made it legally possible in most states for parents to educate their children at home, and each year more people take advantage of that opportunity. Some states require parents or a home tutor to meet teacher certification standards, and many require parents to completelegal forms to verify that their children are receiving (27) _____ in state-approved curricula.

Supports of home education claim that it's less expensive and far more (28)_____ thanmass public education. Moreover, they cite several advantages: alleviation of school overcrowding, strengthened family relationships, lower (29) _____ rates, the fact that students are allowed to learn at their own rate, increased (30) _____, higher standardized test scores, and reduced (31) _____ problems.

Critics of the home schooling movement (32) _____ that it creates as many problems as it solves. They acknowledge that, in a few cases, home schooling offers educational opportunities superior to those found in most public schools, but few parents can provide such educational advantages. Some parents who withdraw their children from the schools (33) _____ homeschooling have an inadequate educational background and insufficient formal training to provide a satisfactory education for their children. Typically, parents have fewertechnological resources (34) _____ than do schools. However, the relatively inexpensivecomputer technology that is readily available today is causing some to challenge the notion that home schooling is in any way (35) _____ more highly structured classroom education.

Part III Reading Comprehension (75 minutes)

Section A

Directions:*In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on* ***Answer Sheet 2*** *with a single line through the centre. You may not use any of the words in the bank more than once.*

注意：此部分题请在**答题卡2**上作答。

Questions 47 to 56 are based on the following passage.

The American patent system, provided for in the Constitution, was designed to encourage the creation and use of new technology. An inventor would describe the invention, both in writing and with drawings, and __47__ the description with a model to a government official. If the invention was judged to be ___48__ and beneficial, the official would give the inventor a patent. The patent meant that for 14 years the inventor owned the new invention. Inventors could ___49__ their ideas to manufacturers or just use them themselves. The government would not ___50__ any other patent for the same idea, and the inventor could ___51__ anyone of using the patented idea with- out paying the owner of the patent for ___52__ to use it.

A useful patent meant that the inventor could make a lot of money. In exchange for this gover- nmental protection, the government published the patent __53___ , which had to provide enough information so that other people could understand the invention — thus adding to the general__54_technological knowledge. And at the end of the 14 years, anyone could use the invention for__55__.The idea behind the patent system was twofold: it would increase the amount of technology, by providing a way for people to make money out of new ideas, and it would make new technology widely available, by publicizing ideas that might ___56__ be kept as trade secrets.

A) license	I) specifications	B) however	J) yield
C) accuse	K) issue	D) submit	L) charge
E) convenient	M) available	F) permission	N) otherwise
G) enable	O) original	H) free	

Section B

Directions:*There are 4 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on* ***Answer Sheet 1*** *with a single line through the center.*

Passage 1

In the 2006 film version of The Devil Wears Prada, Miranda Priestly, played by Meryl Streep, scolds her unattractive assistant for imagining that high fashion doesn't affect her, Priestly explains how the deep blue color of the assistant's sweater descended over the years from fashion shows to departments stores and to the bargain bin in which the poor girl doubtless found her garment.

This top-down conception of the fashion business couldn't be more out of date or at odds with the feverish would be described in Overdressed, Elizabeth Cline's three-year indictment of "fast fashion". In the last decade or so, advances in technology have allowed mass-market labels such as Zara, H&M, and Uniqlo to react to trends more quickly and anticipate demand more precisely. Quicker turnarounds mean less wasted inventory, more frequent release, and more profit. These labels encourage style-conscious consumers to see clothes as disposable-meant to last only a wash or two, although they don't advertise that –and to renew their wardrobe every few weeks. By offering on-trend items at dirt-cheap prices, Cline argues, these brands have hijacked fashion cycles, shaking an industry long accustomed to a seasonal pace.

The victims of this revolution, of course, are not limited to designers. For H&M to offer a $5.95 knit miniskirt in all its 2,300-pius stores around the world, it must rely on low-wage overseas labor, order in volumes that strain natural resources, and use massive amounts of harmful chemicals.

Overdressed is the fashion world's answer to consumer-activist bestsellers like Michael Pollan's The Omnivore's Dilemma. "Mass-produced clothing, like fast food, fills a hunger and need, yet is non-durable and wasteful," Cline argues. Americans, she finds, buy roughly 20 billion garments a year – about 64 items per person – and no matter how much they give away, this excess leads to waste.

Towards the end of Overdressed, Cline introduced her ideal, a Brooklyn woman named Sarah Kate Beaumont, who since 2008 has made all of her own clothes – and beautifully. But as Cline is the first to note, it took Beaumont decades to perfect her craft; her example can't be knocked off.

Though several fast-fashion companies have made efforts to curb their impact on labor and the environment – including H&M, with its green Conscious Collection line –Cline believes lasting change can only be effected by the customer. She exhibits the idealism common to many advocates of sustainability, be it in food or in energy. Vanity is a constant; people will only start shopping more sustainably when they can't afford not to.

21. Priestly criticizes her assistant for her

[A] poor bargaining skill. [B] insensitivity to fashion.

[C] obsession with high fashion. [D] lack of imagination.

22. According to Cline, mass-market labels urge consumers to

[A] combat unnecessary waste. [B] shut out the feverish fashion world.

[C] resist the influence of advertisements. [D] shop for their garments more frequently.

23. The word "indictment" (Line 3, Para.2) is closest in meaning to

[A] accusation. [B] enthusiasm. [C] indifference. [D] tolerance.

24. Which of the following can be inferred from the last paragraph?

[A] Vanity has more often been found in idealists.

[B] The fast-fashion industry ignores sustainability.

[C] People are more interested in unaffordable garments.

[D] Pricing is vital to environment-friendly purchasing.

25. What is the subject of the text?

[A] Satire on an extravagant lifestyle. [B] Challenge to a high-fashion myth.

[C] Criticism of the fast-fashion industry. [D] Exposure of a mass-market secret.

Passage 2

An old saying has it that half of all advertising budgets are wasted-the trouble is, no one knows which half. In the internet age, at least in theory, this fraction can be much reduced. By watching what people search for, click on and say online, companies can aim "behavioural" ads at those most likely to buy.

In the past couple of weeks a quarrel has illustrated the value to advertisers of such fine-grained information: Should advertisers assume that people are happy to be tracked and sent behavioural ads? Or should they have explicit permission?

In December 2010 America's Federal Trade Commission (FTC) proposed adding a "do not track "(DNT) option to internet browsers ,so that users could tell advertisers that they did not want to be followed .Microsoft's Internet Explorer and Apple's Safari both offer DNT ;Google's Chrome is due to do so this year. In February the FTC and Digital Advertising Alliance (DAA) agreed that the industry would get cracking on responding to DNT requests.

On May 31st Microsoft Set off the row: It said that Internet Explorer 10, the version due to appear windows 8, would have DNT as a default.

It is not yet clear how advertisers will respond. Getting a DNT signal does not oblige anyone to stop tracking, although some companies have promised to do so. Unable to tell whether someone really objects to behavioural ads or whether they are sticking with Microsoft's default, some may ignore a DNT signal and press on anyway.

Also unclear is why Microsoft has gone it alone. After all, it has an ad business too, which it says will comply with DNT requests, though it is still working out how. If it is trying to upset Google, which relies almost wholly on default will become the norm. DNT does not seem an obviously huge selling point for windows 8-though the firm has compared some of its other products favourably with Google's on that count before. Brendon Lynch, Microsoft's chief privacy officer, blogged: "we believe consumers should have more control." Could it really be that simple?

26. It is suggested in paragraph 1 that “behavioural” ads help advertisers to:
[A] ease competition among themselves [B] lower their operational costs
[C] avoid complaints from consumers [D] provide better online services
27. “The industry” (Line 6,Para.3) refers to:
[A] online advertisers [B] e-commerce conductors
[C] digital information analysis [D] internet browser developers
28. Bob Liodice holds that setting DNT as a default
[A] many cut the number of junk ads [B] fails to affect the ad industry
[C] will not benefit consumers [D] goes against human nature
29. Which of the following is true according to Paragraph.6?
[A] DNT may not serve its intended purpose
[B] Advertisers are willing to implement DNT
[C] DNT is losing its popularity among consumers
[D] Advertisers are obliged to offer behavioural ads
30. The author's attitude towards what Brendon Lynch said in his blog is one of:
[A] indulgence [B] understanding [C] appreciation [D] skepticism

Passage 3

Up until a few decades ago, our visions of the future were largely - though by no means uniformly - glowingly positive. Science and technology would cure all the ills of humanity, leading to lives of fulfillment and opportunity for all.

Now utopia has grown unfashionable, as we have gained a deeper appreciation of the range of threats facing us, from asteroid strike to epidemic flu and to climate change. You might even be tempted to assume that humanity has little future to look forward to.

But such gloominess is misplaced. The fossil record shows that many species have endured for millions of years - so why shouldn't we? Take a broader look at our species' place in the universe, and it becomes clear that we have an excellent chance of surviving for tens, if not hundreds, of thousands of years. Look up Homo sapiens in the "Red List" of threatened species of the International Union for the Conversation of Nature (IUCN) ,and you will read: "Listed as Least Concern as the species is very widely distributed, adaptable, currently increasing, and there are no major threats resulting in an overall population decline."

So what does our deep future hold? A growing number of researchers and organizations are now thinking seriously about that question. For example, the Long Now Foundation has its flagship project a medical clock that is designed to still be marking time thousands of years hence.

Perhaps willfully, it may be easier to think about such lengthy timescales than about the more immediate future. The potential evolution of today's technology, and its social consequences, is dazzlingly complicated, and it's perhaps best left to science fiction writers and futurologists to explore the many possibilities we can envisage. That's one reason why we have launched Arc, a new publication dedicated to the near future.

But take a longer view and there is a surprising amount that we can say with considerable assurance. As so often, the past holds the key to the future: we have now identified enough of the long-term patterns shaping the history of the planet, and our species, to make evidence-based forecasts about the situations in which our descendants will find themselves.

This long perspective makes the pessimistic view of our prospects seem more likely to be a passing fad. To be sure, the future is not all rosy. But we are now knowledgeable enough to reduce many of the risks that threatened the existence of earlier humans, and to improve the lot of those to come.

31. Our vision of the future used to be inspired by
[A] our desire for lives of fulfillment [B] our faith in science and technology
[C] our awareness of potential risks [D] our belief in equal opportunity
32. The IUCN’s “Red List” suggest that human being are
[A] a sustained species [B] a threaten to the environment
[C] the world’s dominant power [D] a misplaced race
33. Which of the following is true according to Paragraph 5?
[A] Arc helps limit the scope of futurological studies.
[B] Technology offers solutions to social problem.
[C] The interest in science fiction is on the rise.
[D] Our Immediate future is hard to conceive.
34. To ensure the future of mankind, it is crucial to
[A] explore our planet’s abundant resources [B] adopt an optimistic view of the world
[C] draw on our experience from the past [D] curb our ambition to reshape history
35. Which of the following would be the best title for the text?
[A] Uncertainty about Our Future [B] Evolution of the Human Species
[C] The Ever-bright Prospects of Mankind [D] Science, Technology and Humanity

Passage 4

On a five to three vote, the Supreme Court knocked out much of Arizona’s immigration law Monday-a modest policy victory for the Obama Administration. But on the more important matter of the Constitution, the decision was an 8-0 defeat for the Administration’s effort to upset the balance of power between the federal government and the states.

In Arizona v. United States, the majority overturned three of the four contested provisions of Arizona's controversial plan to have state and local police enforce federal immigration law. The Constitutional principles that Washington alone has the power to "establish a uniform Rule of Naturalization "and that federal laws precede state laws are noncontroversial . Arizona had attempted to fashion state policies that ran parallel to the existing federal ones.

Justice Anthony Kennedy, joined by Chief Justice John Roberts and the Court's liberals, ruled that the state flew too close to the federal sun. On the overturned provisions the majority held the congress had deliberately "occupied the field" and Arizona had thus intruded on the federal's privileged powers.

However, the Justices said that Arizona police would be allowed to verify the legal status of people who come in contact with law enforcement. That's because Congress has always envisioned joint federal-state immigration enforcement and explicitly encourages state officers to share information and cooperate with federal colleagues.

Two of the three objecting Justice-Samuel Alito and Clarence Thomas-agreed with this Constitutional logic but disagreed about which Arizona rules conflicted with the federal statute. The only major objection came from Justice Antonin Scalia, who offered an even more robust defense of state privileges going back to the Alien and Sedition Acts.

The 8-0 objection to President Obama turns on what Justice Samuel Alito describes in his objection as "a shocking assertion of federal executive power". The White House argued that Arizona's laws conflicted with its enforcement priorities, even if state laws complied with federal statutes to the letter. In effect, the White House claimed that it could invalidate any otherwise legitimate state law that it disagrees with.

Some powers do belong exclusively to the federal government, and control of citizenship and the borders is among them. But if Congress wanted to prevent states from using their own resources to check immigration status, it could. It never did so. The administration was in essence asserting that because it didn't want to carry out Congress's immigration wishes, no state should be allowed to do so either. Every Justice rightly rejected this remarkable claim.

36. Three provisions of Arizona's plan were overturned because they

[A] deprived the federal police of Constitutional powers.

[B] disturbed the power balance between different states.

[C] overstepped the authority of federal immigration law.

[D] contradicted both the federal and state policies.

37. On which of the following did the Justices agree, according to Paragraph4?

[A] Federal officers' duty to withhold immigrants 'information.

[B] States' independence from federal immigration law.

[C] States' legitimate role in immigration enforcement.

[D] Congress's intervention in immigration enforcement.

38. It can be inferred from Paragraph 5 that the Alien and Sedition Acts

[A] violated the Constitution. [B] undermined the states' interests.

[C] supported the federal statute. [D] stood in favor of the states.

39. The White House claims that its power of enforcement

[A] outweighs that held by the states. [B] is dependent on the states' support.

[C] is established by federal statutes. [D] rarely goes against state laws.

40. What can be learned from the last paragraph?

[A] Immigration issues are usually decided by Congress.

[B] Justices intended to check the power of the Administration.

[C] Justices wanted to strengthen its coordination with Congress.

[D] The Administration is dominant over immigration issues.

Section C Use of English

Directions: *Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET 1. (10 points)*

People are, on the whole, poor at considering background information when making individual decisions. At first glance this might seem like a strength that 1 the ability to make judgments which are unbiased by 2 factors. But Dr. Uri Simonsohn speculated that an inability to consider the big 3 was leading decision-makers to be biased by the daily samples of information they were working with. 4 , he theorised that a judge 5 of appearing too soft 6 crime might be more likely to send someone to prison 7 he had already sentenced five or six other defendants only to forced community service on that day.

To 8 this idea, he turned to the university-admissions process. In theory, the 9 of an applicant should not depend on the few others 10 randomly for interview during the same day, but Dr. Simonsohn suspected the truth was 11 .

He studied the results of 9,323 MBA interviews 12 by 31 admissions officers. The interviewers had 13 applicants on a scale of one to five. This scale 14 numerous factors into consideration. The scores were 15 used in conjunction with an applicant's score on the Graduate Management Admission Test, or GMAT, a standardized exam which is 16 out of 800 points, to make a decision on whether to accept him or her.

Dr. Simonsohn found if the score of the previous candidate in a daily series of interviewees was 0.75 points or more higher than that of the one 17 that, then the score for the next applicant would 18 by an average of 0.075 points. This might sound small, but to 19 the effects of such a decrease a candidate could need 30 more GMAT points than would otherwise have been 20 .
